

In 2019

we analyzed over

2,700

SAMPLES

from

2,000

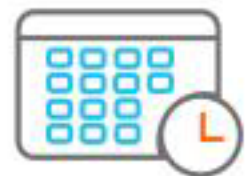

BREATH COLLECTIONS

at partner clinics and customers,
plus our in-house research and
development samples.

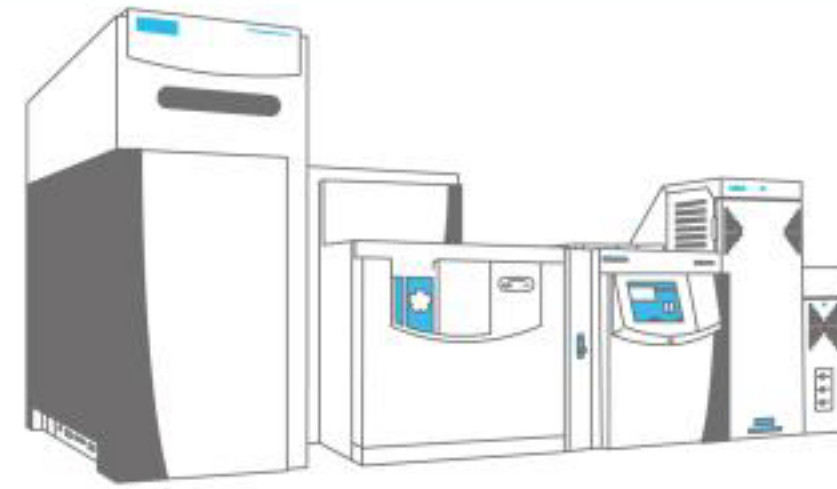

This was
A YEAR-ON-YEAR

53%

INCREASE

By early 2020 our lab was using

13 TD-GC-MS

systems for VOC and breath analysis,
R&D, and product testing.

These include

4 time-of-flight
mass
spectrometers

4 state-of-the-art
Thermo Scientific™
Q Exactive™ Orbitrap™
Mass Spectrometers
plus one more on order

5 benchtop
quadrupole
and ion trap
systems

THE

BREATH
BIOPSY

LAB

employs

18

people

including
analytical chemists
and
lab assistants.

The lab supplies
CLEANED AND TESTED
Breath Biopsy Cartridges
for clinics and customers.

Each Cartridge includes
4 thermal desorption tubes.

We currently have around

10,000

tubes in circulation, managed
through an in-house database.
