## SCIENTIFIC

### Owlstone Medical Enters Partnership with Thermo Fisher Scientific

Owlstone Medical have joined forces with Thermo Fisher Scientific, to advance the application of non-invasive breath sampling, addressing the challenges of early detection and precision medicine via the discovery and validation of novel biomarkers. Under the agreement, both groups will work to integrate the highly sensitive Thermo Scientific™ Q Exactive™ GC Hybrid Quadrupole-Orbitrap™ Mass Spectrometer into Owlstone Medical's Breath Biopsy® platform, which upon completion will then become a standard part of Owlstone Medical's unique breath biomarker discovery process.

Further to the sharing of scientific and technical expertise, this collaboration will be supported by a joint marketing and customer support efforts to expand the global reach of the Breath Biopsy platform.

## Breath Biopsy Conference

### Express Your Interest in the next Breath Biopsy Conference

The 2019 Breath Biopsy Conference took place in Cambridge on 13<sup>th</sup> and 14<sup>th</sup> November. The Owlstone Medical team welcomed over 140 delegates for two-days of presentations, posters, discussions and networking.

Day one saw keynote speakers Jane Hill and Jessica Lasky-Su present on infectious disease diagnosis and metabolomics respectively. Day two of the conference included a further keynote by George Hanna from Imperial College London and closed with a lively expert panel discussion on 'The next five years in breath research.' Alongside the main programme, delegates enjoyed the popular poster session and had the opportunity to get their hands on the new range of Breath Biopsy products, and meet our expert teams, who were on hand to answer questions about the platform.

Owlstone Medical CEO Billy Boyle said, "I think this year's conference has been a great success. This is our second conference and it has doubled in size, bringing together people from very diverse fields, including analytical chemists to clinicians".

"The conference enables us to foster a community where collaboration is a key aim. For me the key highlight of the conference was the range of the different speakers and the depth of experience among the delegates. I would like to say a massive thank you to everyone who attended this year's event and we look forward to welcoming you to next year's conference."

### Breath Biopsy included in €80 Million 3TR Immunology Consortium

Owlstone Medical has joined 3TR, a large-scale public-private research initiative that aims to provide new insights into the mechanisms of response and non-response to treatment within and across seven different immune-mediated diseases.

The project unites renowned, interdisciplinary experts from 69 academic and industrial partner institutions, including multiple top-ten pharma, covering 15 European countries. The initiative will provide access to an unprecedented quantity of clinical data and samples of more than 50,000 patients across 50 ongoing and new clinical trials, ultimately aiming to discover and verify stratification biomarkers to improve patient management.

Billy Boyle, co-founder and CEO at Owlstone Medical, said: "3TR's ground-breaking approach to addressing this problem through integrated cross-disease analysis, led by leading academic, pharmaceutical, and other organizations, is one that Owlstone Medical is excited to be making a unique contribution to."
