Non-invasive Functional Assessment of the Microbiome from Exhaled Breath

This on-demand webinar is aimed at researchers interested in exploring the use of non-invasive volatile metabolites in relation to the microbiome and anyone with an interest in learning more about breath research.

A webinar examining the volatile metabolites that originate within the microbiome, and how Breath Biopsy® technology can expedite your research.

- Introducing Owlstone Medical, the Breath Biopsy OMNI® platform and the advantages of breath analysis.
- Understanding the various metabolites measurable on breath and associated with the microbiome.
- Explores a number of case studies and the future potential of de-centralized breath collection and analysis.
